

Appl. No. 09/932,038
Amdt. Dated 05/05/2006
Reply to Notice of Non-Compliant Amendment

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A computerized method, comprising:
receiving from a first device being controlled by a user, across one or more networks, one or more files to a storage location, each of the one or more files having a first format;
transferring a selected file onto a different media based on input from the first device, the selected file having a second format differing from the first format; and
providing a file transfer notification to a second device, across the one or more networks.
2. (Original) The method of claim 1, further comprising:
generating a media transfer request.
3. (Original) The method of claim 2, further comprising:
providing media transfer notification to the second device, across the one or more networks.
4. (Original) The method of claim 1, wherein the first device is the same as the second device.
5. (Original) The method of claim 1, further comprising, a server receiving input from the first device to select one or more files in archive.
6. (Previously Presented) The method of claim 1, wherein the first format being a tiff format and the second format being a JPEG format.
7. (Original) The method of claim 6, wherein, the server provides media transfer notification to the first device.

Appl. No. 09/932,038
Amdt. Dated 05/05/2006
Reply to Notice of Non-Compliant Amendment

8. (Previously Presented) The method of claim 1, wherein the first format being a MP3 format and the second format being a DVD format.

9. (Previously Presented) The method of claim 1, further comprising, tracking a mailing status of the media transferred files.

10. (Original) The method of claim 1, wherein the first device is Internet enabled.

11. (Original) The method of claim 1, wherein the first device is telephony enabled.

12. (Original) The method of claim 1, wherein the first device selected from the group consisting of an ATM, a photo kiosk, a personal computer, a pager, telephone, and an Internet-enabled PDA.

13. (Original) The method of claim 1, wherein the second device is telephony enabled.

14. (Previously Presented) The method of claim 1, wherein the second device is selected from the group consisting of pager, telephone, fax, answering machine and telephony-enabled PDA differing from the first device being a computer.

15. (Original) The method of claim 1, wherein the second device is a letter delivered by a public mail system.

16. (Original) The method of claim 1, wherein the received files are graphic files.

17. (Original) The method of claim 1, wherein the received files are audio files.

18. (Original) The method of claim 1 wherein one of the one or more networks is the PSTN.

Appl. No. 09/932,038
Amdt. Dated 05/05/2006
Reply to Notice of Non-Compliant Amendment

19. (Original) The method of claim 1, wherein one of the one or more networks is selected from the group consisting of the Internet, WAN, and LAN.

20. (Original) The method of claim 19, wherein VPN is implemented.

21. (Previously Presented) A computerized system, comprising:

a server, comprising:

a file manager, and

a storage medium, wherein the server connects a first device to an account through one or more networks for file transfer and media transfer requests, and generating media transfer notification identifying completion on an event involving a transfer of a file from a first format to a second format and file transfer notification identifying completion of a transfer of the file in the first format to the server.

22. (Previously Presented) The system of claim 21, further comprising the server capable of automatically sending to a second device, the media transfer notification and file transfer notification.

23. (Previously Presented) The system of claim 22, wherein the second device is selected from the group consisting of a pager, a telephone, a fax, an answering machine and a telephony-enabled PDA differing from the first device being a computer.

24. (Previously Presented) The system of claim 22, wherein the first device is Internet-enabled.

25. (Previously Presented) The system of claim 22, wherein the first device is telephony-enabled.

26. (Previously Presented) The system of claim 22, wherein one of the one or more networks is PSTN.

Appl. No. 09/932,038
Amdt. Dated 05/05/2006
Reply to Notice of Non-Compliant Amendment

27. (Previously Presented) The system of claim 22, wherein one of the one or more networks is a LAN.

28. (Previously Presented) The system of claim 22, wherein one of the one or more networks is a WAN.

29. (Previously Presented) The system of claim 22, where the second device is telephony-enabled.

30. (Previously Presented) The system of claim 22, where the second device is the same as the first device.

31. (Original) An apparatus, comprising:
one or more networks;
means for interacting with a server;
means for receiving media transfer notification, and
means for receiving file transfer notification.

32. (Original) The apparatus of claim 31, further comprising:
means for transferring files; and
means for storing files.

33. (Original) The apparatus of claim 31, further comprising:
means for obtaining the files in a transferred media.

34. (Original) The apparatus of claim 33, further comprising:
means for tracking a mailing status of the transferred media.

35. (Original) A machine-readable medium having executable instructions for performing a method, the method comprising:
transferring one or more files across one or more networks;

Appl. No. 09/932,038
Amdt. Dated 05/05/2006
Reply to Notice of Non-Compliant Amendment

transferring at least one of the one or more files into a different media;
providing file transfer notification; and
providing media transfer notification.

36. (Original) The machine-readable medium of claim 35 having further executable instructions for performing a method, the method further comprising:
transferring the one or more files from the archive to a different media.

37. (Original) The machine-readable medium of claim 35 having further executable instructions for performing a method, wherein the media transfer notification confirms a successful file transfer into an archive.

38-40. (Cancelled).

41. (Previously Presented) A system, comprising:
a processor;
a memory coupled to the processor through a bus; and
a file archive and media transfer process executed from the memory by the processor to cause the processor to receive from a first device, across one or more networks, one or more files to a storage location, to provide file transfer notification to a second device once the one or more files have been uploaded to the system, to transfer a selected file having a first format of the one or more files into the selected file having a second format differing from the first format before transfer to one of the first and second devices.

42. (Original) The system of claim 41, wherein the file transfer notification of an event selected from the group consisting of successful file transfer, partially successful file transfer, and unsuccessful file transfer.

43. (Original) The system of claim 41, further comprising:
one or more files converted to a different media and the different media delivered to an address.

Appl. No. 09/932,038
Amdt. Dated 05/05/2006
Reply to Notice of Non-Compliant Amendment

44. (Original) The system of claim 43, wherein a media transfer notification is sent to the second device to provide tracking information on a shipment of the files transferred to the different media.

45. (Previously Presented) The system of claim 41, wherein the first device is a computer and the second device is a cellular telephone.

46. (Previously Presented) The system of claim 41, wherein the second device is selected from the group consisting of pager, telephone, fax, answering machine and telephony-enabled PDA differing from the first device being a computer.
